

Performance Results

RIG ELECTRIFICATION

RIG	Rig X09
LOCATION	West Texas
DATE	09 22 24 - 11 25 24

138,042* gallons of diesel fuel saved

1,414* mt of CO2e Reduction

743* mt CO2e net emissions reduction

*Estimated Value

Sources: 1) The diesel saved is calculated based on comparison of electricity consumption vs. diesel consumed by an average three generators online per day 2) CO2 equivalent reduction is calculated based on the EPA's GHG calculation equivalencies for diesel consumed [Greenhouse Gas Equivalencies Calculator - Calculations and References | US EPA](#)
